1. Introduction

With over 15 years of export excellence, Aisirui (ASR) provides high-durability ceramic sanitary ware designed for the North American and European markets. This guide ensures our partners select the perfect dimensions for their specific market requirements and plumbing standards.

2. Ceramic Basin Dimension Table

Basin Type	Width (mm)	Depth (mm)	Installation Mode
Cabinet Basin	600, 800, 1000, 1200	460, 470, 480	Drop-in / Inset
Thin Edge Basin	400, 500, 600	380, 400, 420	On-counter
Wall-Hung Basin	450, 550, 650	350, 450	Wall-mounted
Art Basin	360, 410, 480	Round / Oval	Above-counter

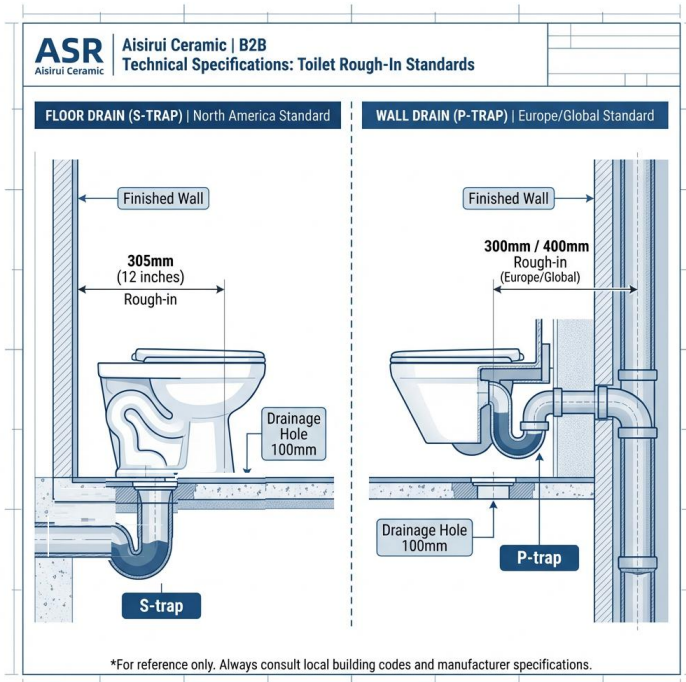

3. Toilet & Bidet Specifications

Standard Rough-in:

- North America: 12 inches (305mm) - Standard for US projects.
- Europe/Global: 300mm / 400mm - S-trap and P-trap options available.

Drainage & Flushing:

- Drainage Hole: Standard 100mm (4 inches) for seamless installation.
- Flushing Volume: Dual flush 3L/6L or 4.8L (Eco-friendly standards)

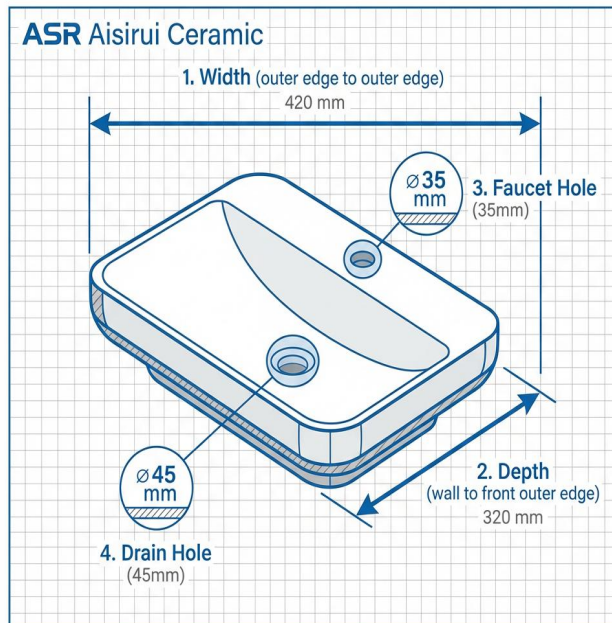

4. How to Measure Your Bathroom Sink

1. Measure the Width: From outer edge to outer edge.
2. Measure the Depth: From the wall to the front outer edge.
3. Check the Tap Hole: Standard 35mm diameter for most European and US faucets.
4. Confirm the Drain Size: Standard 45mm (1.75 inches) for pop-up wastes.
